SWARAJ KHADALKAR

kswaraj0045@gmail.com LinkedIn

Profile

Software Engineer Intern with expertise in software development and deep learning integration. Proficient in Java, Python, and C++, with experience in Spring Boot, PostgreSQL, React, and AWS. Skilled in developing deep learning pipelines using YOLOv8 for image analysis and diagnostic automation. Strong interest in leadership, management, and data analysis, with a focus on delivering high-quality solutiaons and collaborating effectively in agile environments.

Education

MIT Acadeny Of Engin **Aug 2023 – Present**
B.Tech in Computer Science *Alandi.Pune*

Technical Skills

Languages: Java, Python, C++
Frameworks: Spring, Spring Boot
Platforms: AWS, Vercel, Supabase Postgres
Tools: Git, GitHub, AWS, Docker, linux, Tableau

Professional Experience

Street-Up **Jun 2026 – Aug 2026**
Software Engineer Intern

- **Software Development Intern** | Fast-Paced Startup Environment
- Collaborated with cross-functional teams to analyze project requirements and engineer robust software solutions.
- Delivered high-quality code within strict deadlines, adhering to professional software development lifecycles(SDLC) and best practices.
- Enhanced proficiency in agile teamwork, technical communication, and complex problem-solving to drive project success.

Projects

Dental CRM **May 2026**
Built a **multi-tenant SaaS platform** for patient, appointment, treatment, odontogram, and clinical-history management.
Implemented **clinic-level data isolation and role-based access control** using Supabase Auth and PostgreSQL RLS.
Developed **interactive clinical workflows, dashboards, reports, and optimized data management** with search and pagination.
https://dentaldashboard.street-up.in/ | *[React 19, TypeScript, Vite, Supabase, PostgreSQL]*

Scoliosis Detection & Cobb Angle Measurement **Jan 2026**
Engineered a two-stage deep learning pipeline to automate scoliosis detection from spinal X-rays, significantly enhancing diagnostic efficiency.
Leveraged YOLOv8 for precise spine and torso localization, integrated with advanced **keypoint and segmentation models** to achieve accurate vertebral landmark detection.
Developed an automated Cobb angle calculation algorithm based on detected vertebral landmarks, successfully streamlining scoliosis severity assessment with a target **MAE of $< 5°$**.
Link | *[Python, Deep Learning, YOLOv8, Keypoint Detection, CNN]*

Leave Application Management System **Nov 2025**
Developed a **leave management system** for employees to apply for leaves and managers to review, approve, or reject requests.
Implemented **RESTful APIs and database persistence** using Spring Boot, Spring Data JPA, and MySQL.
Added **role-based workflows** to separate employee leave applications from manager approval actions.
Link | *[Spring Boot, JAVA, My SQL, REST API]*

Certifications

- **Cloud Foundation Training Badge - AWS academy:** Certificate
- **TCS iON Career Edge - Young Professional:** Certificate

Achievements

- **Finalist - Avishkar 2025:** Aavishkar – SPPU | State-Level Research Convention — Selected in the Maharashtra State Inter-University Research Convention, presenting an innovative technology-based solution to a real-world problem.
